### WA334

Up & down Universal waste

- A single article and the greatest ease of installation for a universal product to be fitted on any kind of washbasin: with or without overflow, in porcelain, glass or steel, inset, supported or suspended on a counter.
- Exclusive 1 1/4" pop up waste made of extremely durable thermoplastic material comes in one version only 100 mm high, can be cut to size in accordance with the heights set out below:
- Outlet holes for overflow to be simply punched out or cut out.
- Can be cut to the desired height by simply cutting the waste with a hacksaw along the markings.

### UD390 H.60mm 25-49mm

UP & DOWN Brass pop up waste with overflow

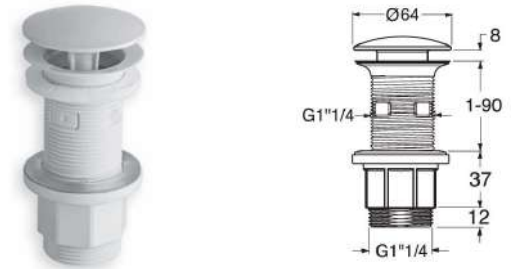

- Exclusive mechanism tested at 1,000,000 cycles, Made of extremely durable thermoplastic material and controlled by a stainless steel spring to return it to the open position. In the closed position, it becomes watertight by means of a lip seal thanks to the force of gravity.
- To allow for proper maintenance and cleaning the drain, the entire mechanism can be easily inspected, sliding the plug out of the pop up waste.

### WA420
