LEADING THE WAY

Οι λεκάνες Lotus είναι κατασκευασμένες από συνθετικό υλικό acrystoneu υψηλής αντοχής και σκληρότητας. Προσαρμόζεται εύκολα σε κάθε χώρο καθώς διατίθεται σε πολλές διαστάσεις και μπορεί να κοπεί (βλ.σχετικό πίνακα πχ Πλευρές L 10εκ κόβεται 5εκ στην κάθε πλευρά, **δεν κόβεται στην μία πλευρά W που είναι το σίγμα!**).

Η επιφάνεια της ντουζιέρας, λόγω των ιδιοτήτων της ως προιόν μη πορώδες αποτρέπει την δημιουργία βακτηριδίων και είναι αντιολισθητική. Διαθέτει υψηλή αντοχή στα χημικά προϊόντα καθαρισμού και εξαιρετικής σκληρότητας επιφάνεια.

Διαθέτουμε σε stock τα χρώματα Bianco/Λευκό και Antracita/Μαύρο. Με παραγγελία προς το παρόν διατίθενται και σε άλλα 2 χρώματα Beige/Cemento.

Το πάχος την ντουζιέρας είναι 2.5εκ και από τα μεγέθη άνω των 160εκ το πάχος είναι 2.7εκ.

Η συσκευασία περιλαμβάνει το σίγμα με ανοξείδωτη σχάρα.

Ο κατασκευαστής προσφέρει 5 χρόνια εγγύηση.

Αγορά 3 τεμάχια επιπλέον έκπτωση 3%

ACRYSTONE® CLEANING

Shower tray

Pay special attention to the product installation as any cement or mortar residue may damage it. In order to remove them, use a specific cement cleaner. Avoid rubbing the surface directly to avoid scratching it.

After every use, clean with water and ensure a good ventilation of the bathroom. For the routine cleaning of the shower tray, use water, liquid cleaners and soft cloths or non-abrasive sponges. Never use scourers or abrasive substances as they can damage the surface of the shower tray. Don't mix different cleaning products.

Clean the shower tray using a damp cloth and a cleaning product specific to the type of stain (limescale, cement adhesive for tiles, grease, soap residue).

In order to remove limescale residues, use an **antiscala** product following this steps:

1. - Remove the drainage grille and apply the antiscala product with the help of a damp cloth over the entire surface of the shower tray.
2. - Leave the product to act for **15 minutes**, then rinse thoroughly.
3. - Place the grille back and rinse the shower tray again.

If stains persist, after cleaning with soap and water, use **cleaning vinegar diluted in water**. In this case, repeat the above steps and let the product act for **5 minutes**.

In case of stubborn stains, before applying the appropriate stain remover, clean the shower tray by rubbing with a plastic brush and rinse with plenty of water.

The grille should be regularly cleaned, therefore remove it and apply a stainless steel cleaning product.

If you use hair dye, rinse the shower tray with soap and water after every shower.

Pay special attention to the logo so gently clean it as it could be damaged.

When the surface of the shower tray is wet, the risk of slipping increases, this is more significant when using soap, shampoo, bath oils or similar products.

Washbasins / Bathroom Worktops / Bathroom furniture / Shower panels

Pay special attention to the product installation as any cement or mortar residue may damage it. In order to remove them, use a specific cement cleaner. Avoid rubbing the surface directly to avoid scratching it.
